595

DIFFERENT FROM ANY OTHER. ALWAYS UP TO ITS OWN STANDARDS.

Always in the step with the times and a step ahead of the others. Abarth shifts the focus to new levels by adding an unmistakable and distinctive character to performance, which does not go unnoticed. The 595 has been refreshed, with no changes. New ways of interpreting and experiencing modernity, all different from the next, but all unmistakably Abarth. New livery, new interiors and new details to mark out the entire line-up, with pride, style and personality.

A white Ferrari sports car is parked in a garage, viewed from the rear. The car has a license plate that reads 'AB-595ES'. To the left of the car, there are several red fire extinguishers. In the foreground on the right, a blurred red car is visible, suggesting motion. The background shows a large open garage door leading to an outdoor area with red seating and bright lights. The text 'PERFORMANCE AS LIFESTYLE.' is overlaid on the right side of the image.

PERFORMANCE AS LIFESTYLE.

A cinematic photograph taken from the driver's perspective inside an Abarth car at night. The car's interior features dark leather seats with a quilted pattern and 'ABARTH' embroidered on the headrests. The steering wheel and dashboard are visible on the right. Through the open driver-side door, a man in a dark suit and a woman in a black dress and wide-brimmed hat are walking away from the car towards a brightly lit city street at night. The scene is illuminated by the car's interior lights and the vibrant, colorful lights of the city outside, creating a sophisticated and stylish atmosphere.

The values of the CO₂ emissions and fuel consumption are defined on the basis of official tests in compliance with the provisions under the applicable EU Regulation in force at the time of the homologation. In particular, the values indicated are determined on the basis of the WLTP test procedure. The CO₂ and fuel consumption values obtained according to applicable regulation are indicated in order to allow the comparison of vehicle data. The values of CO₂ and fuel consumption may not reflect the actual values of CO₂ and fuel consumption, which depend on many factors related, by way of example but not limitation, to the driving style, the route, the weather and road conditions, as well as the condition, use and equipment of the vehicle. The indicated value of CO₂ and fuel consumption refers to the versions of the vehicle with the highest and the lowest values. Those values may change with sub-sequent configuration depending on equipment selected and/or size of tires selected. The indicated values of CO₂ and fuel consumption are not definitive and may evolve as a result of changes in the production cycle. In any case, the official values of CO₂ and fuel consumption of the vehicle purchased by the customer will be provided with the vehicle's accompanying documents. In cases where the values of CO₂ and fuel consumption are relevant for the purposes of calculating taxes and duties related to the vehicle, reference should be made to the applicable laws in each Country.
